

## John F. Nelson

P.E CHEMICAL ENGINEERING, ARM  
LICENSED ADJUSTER

Prior to working with Integra Technical Services (North America) in 2013, John developed his technical and professional background in the Oil and Chemical Process Industries, including production unit supervision, process design, environmental engineering design and regulatory compliance responsibilities at two international engineering and procurement companies. He then transitioned into the insurance sector as a Senior risk Engineer at Zurich Global Energy providing risk management advice to major oil companies.

In 2002 John moved into loss adjusting and since then he has held senior positions at Matthews Daniel and AquaTerra managing a variety of upstream, midstream and downstream property, casualty, builder's risk and time element claims.

He has operated extensively throughout North and South America, Europe and Asia.

## Qualification

Bachelor of Science (B.S.) Chemical Engineering, Louisiana State University

Bachelor of Science (B.S.) microbiology, Louisiana State University

Professional Engineering registrations in Texas, Louisiana, California

Licensed Adjuster

Integra Technical Services  
Williams Tower  
2800 Post Oak Boulevard  
Suite 4100  
Houston, TX 77056  
USA

## Work experience

- Energy Loss Adjusting: 13 Years – Upstream, Mid-Stream, Downstream, 1st Tier Petrochemicals
- Zurich Risk Engineering Services: Refining and Petrochemical Risk Assessment
- Foster Wheeler: Process Safety Management Lead Consultant
- UOP: Environmental Engineering Co-ordinator
- Union Carbide: Plant Maintenance Superintendent
- Stauffer Chemical Company: Process Design, Plant Production Unit Supervisor

## Specialist areas of activity

- Construction / Builders Risks: Major Projects relating to oil, gas, petrochemicals and power generation sectors
- Engineering: Work in this area extends to operational power generation, pipeline transmission installations and oil field production equipment losses
- Oil, Gas & Petrochemicals: John's experience includes both onshore refining and process installations as well as offshore E & P risks and LOPI, together with pipeline pollution and marine Oil Terminal Liability exposures
