

## Richard Gross

ACII, FCILA, FUEDI-ELAE  
Chartered Loss Adjuster

Richard commenced his professional career as a Loss Adjuster in 1986, initially in the dedicated construction division of a London based adjusting operation, dealing with CAR/EAR losses throughout the UK and mainland Europe. Having passed the examinations of the Chartered Insurance Institute and the Chartered Institute of Loss Adjusters, Richard embarked on a long and varied expatriate career path, initially in the Middle East and France, before taking up roles in South East Asia (living in Malaysia, Indonesia and Taiwan). During that time, Richard was closely involved in the handling of several major high profile losses, including the explosion at the Total La Mede refinery in Provence, France and the fire which destroyed the UICC semiconductor wafer fab plant in Hsinchu, Taiwan.

In 1999, Richard relocated to Latin America and after a brief spell living and working in Venezuela, he moved to Mexico where he eventually became the Regional Director for Latin America for a large international loss adjusting practice. During a period encompassing 13 years living in Latin America, Richard has handled losses throughout the continent, focusing principally on large/complex losses in construction, energy, engineering and allied lines, including business interruption and DSU/ALOP.

As a fluent Spanish speaker, Richard is a regular contributor to technical publications and seminars in the region and has also acted as an expert witness in several arbitration/litigation proceedings in Latin America, providing testimony in Spanish.

In 2011, Richard started working with Integra Technical Services and was closely involved in the opening of the Integra Latin America regional office in Mexico. Richard currently splits his time between Europe and Latin America, handling his own caseload of losses in Latin America and overseeing cases handled from the Integra offices in Mexico, Miami and Santiago.
